

Easy to Implement, Easy to Use

All you need to use eznetpay® is Internet access and an email address. Because the platform is cloud-based, you won't need to buy any hardware, software or networking equipment. When you decide to implement eznetpay, you'll be up and running within 10 business days. We understand that the sooner you're able to use the platform, the sooner you'll begin to work more efficiently—and begin to save money.

Your implementation process will include on-site training from one of our experts. You'll understand the ins and outs of the intuitive platform in no time. We use this "train the trainer" approach so it's easy for you to train new users as you add them. If more training is needed, we can follow up with online webinars. You can also find self-guided tutorials online any time you need them, under the "How To Videos" tab within the eznetpay platform.

In addition to the in-person and online training and support you'll receive, our help line is always a call away. Just call us at **877-677-3711** between 8 a.m. and 5 p.m. Central Time, Monday through Friday. You can also email us at **support@eznetpay.com**.
